

Schools Info Pack

Everything you need to plan a 3D printing project for your classroom.

What We Offer

Custom 3D-printed pieces for the classroom. Each student gets a unique, hand-checked toy or model printed in eco-friendly PLA plastic. We work with you on themes, colours, and quantities to match your curriculum.

- **STEM class sets** — each child takes home a printed piece they helped design
- **Bulk orders** — for incursions, end-of-term gifts, or school events
- **Custom colours** — students can choose their own colour combinations
- **Time-lapse videos** — short clips of each piece being printed, layer by layer (on request)

How It Works

1. Tell us what you're planning — year level, class size, theme, and timeline.
2. We suggest options — models, colours, and pricing that fit your budget.
3. We print and check — every piece is hand-inspected before packing.
4. Delivered to your school — packed, labelled, and ready for class.

Indicative Pricing

Pricing varies by model, size, and colour complexity. Here's a ballpark:

Order Type	Per Student	Example (30 students)
Small pieces (keyrings, bookmarks)	From \$5	~\$150
Medium pieces (flexi animals, figures)	From \$8	~\$240
Large display pieces (dragons, robots)	From \$12	~\$360
Time-lapse video add-on	+\$2	+\$60

Free shipping on orders over \$50. We can invoice your school directly for purchase orders.

Materials & Safety

- **PLA plastic** — plant-based, biodegradable, non-toxic, and widely used in educational settings
- **Hand-checked** — every piece is inspected for rough edges before packing
- **Replacement guarantee** — if a piece arrives damaged, we reprint and reship at no cost
